

## AGILE TESTING TRAINING

ICP  
TST

CERTIFIED PRO  
AGILE  
TESTING

The Agile Testing and Test Automation track constitutes two Continuous Learning Certifications (CLCs), one of which is the ICP-TST. The curriculum of this course focuses mainly on agile testing techniques and processes while exploring the mind set and role of the agile tester. Learning objectives include the ability to differentiate the different type of testing on an agile project. In addition, we explore how

business, development, and testing representatives best collaborate in an agile development cadence. Participants will learn various agile test strategies coupled with techniques related to the activity of release planning, testing within sprints, regression testing, performance testing, pre-deployment and production support testing.

# QUALITY IS EVERYONE'S RESPONSIBILITY!

## LEARNING OBJECTIVES

- ✓ Overview of Agile Testing
- ✓ Mind set and Culture
- ✓ Categories of Testing
- ✓ Collaborating with Developers
- ✓ Example Driven Development
- ✓ Feature & Story Testing
- ✓ Roles and Responsibilities
- ✓ Test Strategy and Planning
- ✓ Successful Delivery
- ✓ Test Environments and Infrastructure

## TARGET AUDIENCE

- ✓ Software Testers
- ✓ Test Analyst
- ✓ Scrum Masters
- ✓ Business Analysts
- ✓ Product Owners
- ✓ Anyone Interested

- Prerequisite:** ICAgile Certified Professional (ICP)
- Certification:** ICAgile Certified Professional in Agile Testing (ICP-TST)
- Examination:** No
- Cost:** R6900 per person excl. VAT
- Duration:** 2 Days
- Location:** Johannesburg and Cape Town (other locations on request)
