

Over 10 000 companies with development teams worldwide, large and small, chose Axosoft for their development needs.

- Highly flexible, visual project management
- Manage user stories, sprints and releases
- Powerful bug tracking
- Versatile integration into your existing development tools
- Customer self-service portal

Axosoft is feature-packed, blazingly fast, easy to use, affordable, and built for your browser and mobile devices.

Agile project management software your team will love to use.

Axosoft Scrum

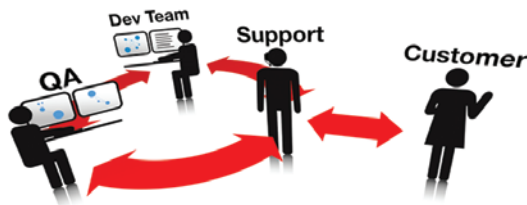

Axosoft is highly configurable and supports all Agile methodologies - Scrum, XP, Disciplined Agile Delivery, Kanban methodology etc.

Manage your dev team's backlog, sprints/iterations and bug tracking—and you can manage unlimited projects.

You'll love the management dashboard, planning board and burndown charts.

Axosoft Help Desk

Axosoft Help Desk provides your support team with the ability to better track and resolve your customers' support issues.

Includes a web-based Customer Portal, allowing your customers to self-report and track their issues and incidents.

Axosoft Wiki

Keep your valuable project information in one central location, instead of scattered in a sea of emails.

A great collaboration tool for brainstorming ideas, coding guidelines, tutorials, corporate values, internal policies and more.
