

**DVT UNVEILS  
MENDIX 3.0**

DVT has announced it will take the Mendix 3.0 Agile Business Platform to market. The new version simplifies the full agile application life cycle management process by further enabling rapid development, deployment and management of enterprise applications in the cloud. With Version 3.0, Mendix's agile solution further delivers on its speed and flexibility by simplifying the deployment and management of multiple Mendix applications. By providing a centralised, cloud-based management dashboard to monitor application performance and activity, IT departments now have complete control over their cloud application landscape.
