

**DVT CO-SPONSORS
SCRUM SAFARI**

Application software developer DVT was part-sponsor of South Africa's second ever Scrum gathering, hosted in Johannesburg on 9 September, at the Sandton Convention Centre, and in Cape Town on 13-14 September, at the Erinvale Resort Hotel, in Somerset West. The gathering had a 'safari' theme, being representative of wild Africa and drawing parallels between animals typically seen on safari and the various role players within Scrum. Originally formalised for software development projects, but now a popular methodology used for any complex, innovative scope of work, Scrum is an agile framework for managing multifaceted projects.
