

**GARTNER RECOGNISES
MENDIX**

Mendix has received recognition in three separate Gartner reports. South Africa's DVT represents Mendix locally. "These findings are consistent with the results our customers have seen, and we are obviously pleased to be placed into high-impact categories by such a

recognised and respected research firm," says Paul Campaniello, VP of worldwide marketing. The reports were: IT Market Clock for Application Development, 2011; Hype Cycle for Application Architecture, 2011; and Hype Cycle for Application Development, 2011. Published by the IT industry's premier analyst firm, the reports forecast Mendix and similar technologies entering a mainstream adoption phase.
